

The outputs of a data science experiment

Brian Caffo, Jeff Leek, Roger Peng

@bcaffo

www.bcaffo.com

Some of the most common output from a data science experiment

1. Reports
2. Presentations
3. Interactive web pages
4. Apps

Ideally reports given to you will be

- Clearly written
- Involve a narrative around the data
 - Creation of analytic dataset
 - Analysis
- Concise conclusions
- Omit unnecessary details
- Reproducible

Same exact criteria for presentations:

- Clear
- Involve a narrative around the data
 - Creation of analytic dataset
 - Analysis
- Concise conclusions
- Omit unnecessary details
- Reproducible

Apps and web pages

- Easy to use
- Help pages or documentation
- Code should be documented well
- Code should be version controlled
